A.

1.What **lies** directly **above** the tentorium?

The **parietal** lobes.

B.

The temporal lobes.

C.

The cerebellum

D.

The **frontal lobes**.

E.

The occipital **lobes**..

2.What **are** the major structural differences between **dorsal** root **ganglia** (DRG) and autonomic **ganglia?**

A.

B.
One is **derived** from neural crest and the other from neural tube.

The DRG contain the cell bodies of sensory neurons whereas the sympathetic **ganglia** contain the synaptic junctions between preganglionic and postganglionic neurons.

Both **have** synapses.
C.

D.
One belongs **to** the CNS and the other belongs **to** the PNS.

3.What vessel(**s)** serve(**s)** areas involved in speech in the majority of people**?** A. Right middle cerebral artery.

B. Right and **left** middle **cerebral** arteries

C. **Left** middle **cerebral** artery.
