- MAKE SURE TO SUBMIT YOUR PRACTICAL JOURNALS IN POWERLAB AS SOON AS YOU ARE DONE WITH OSPE.

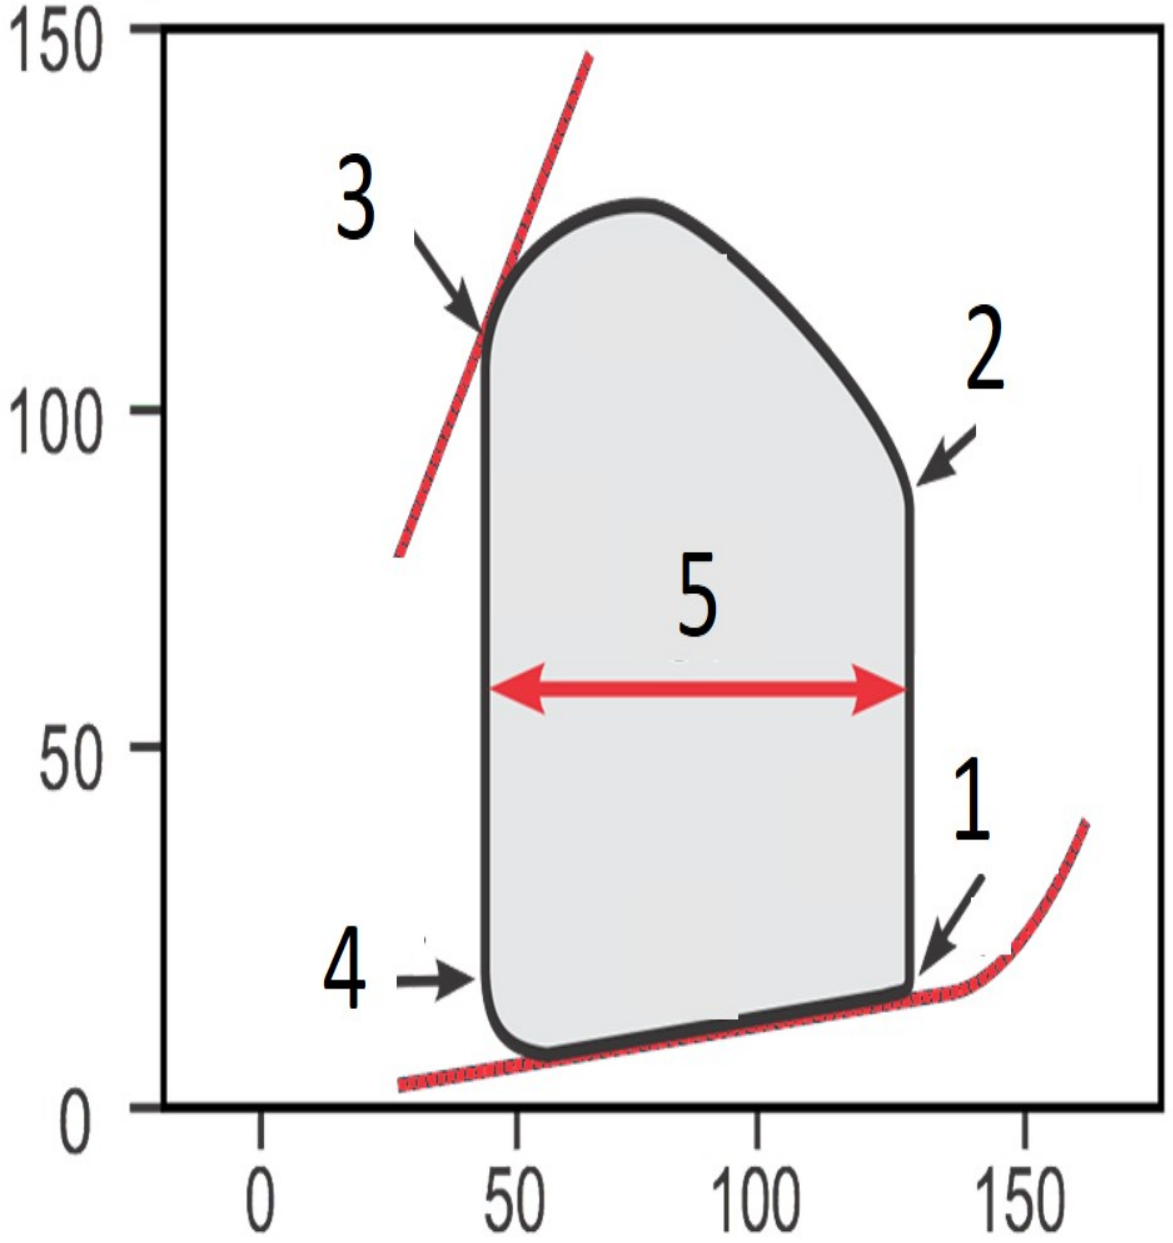

SPOT NO.1

1. Diagnose the abnormality seen in the ECG strip
2. Calculate the approx. heart rate of the given ECG strip
3. What are the ECG findings of hyperkalemia?

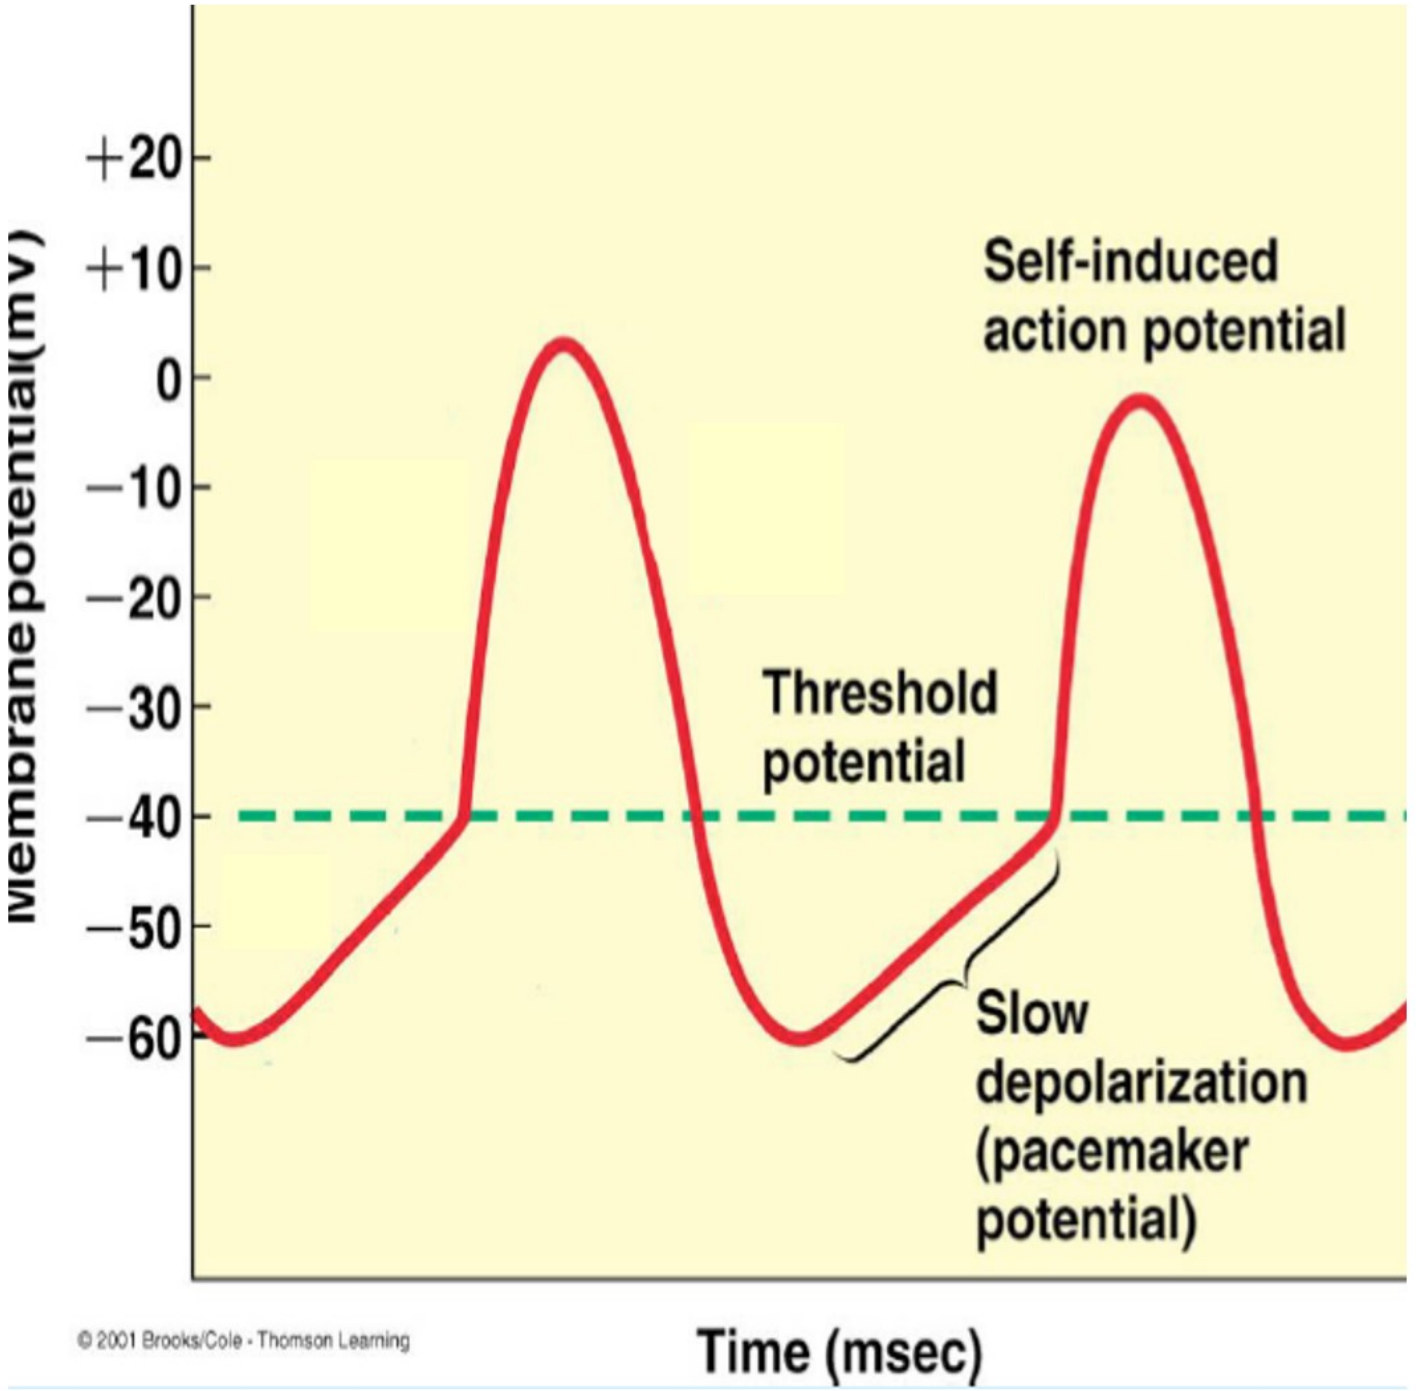

SPOT NO.2

1. Identify the phases of cardiac cycle as following:
   1 – 2; 2 – 3; 3 – 4; 4 – 1
2. Define Cardiac output and Stroke volume.
3. What is Cardiac index? Write its normal value.

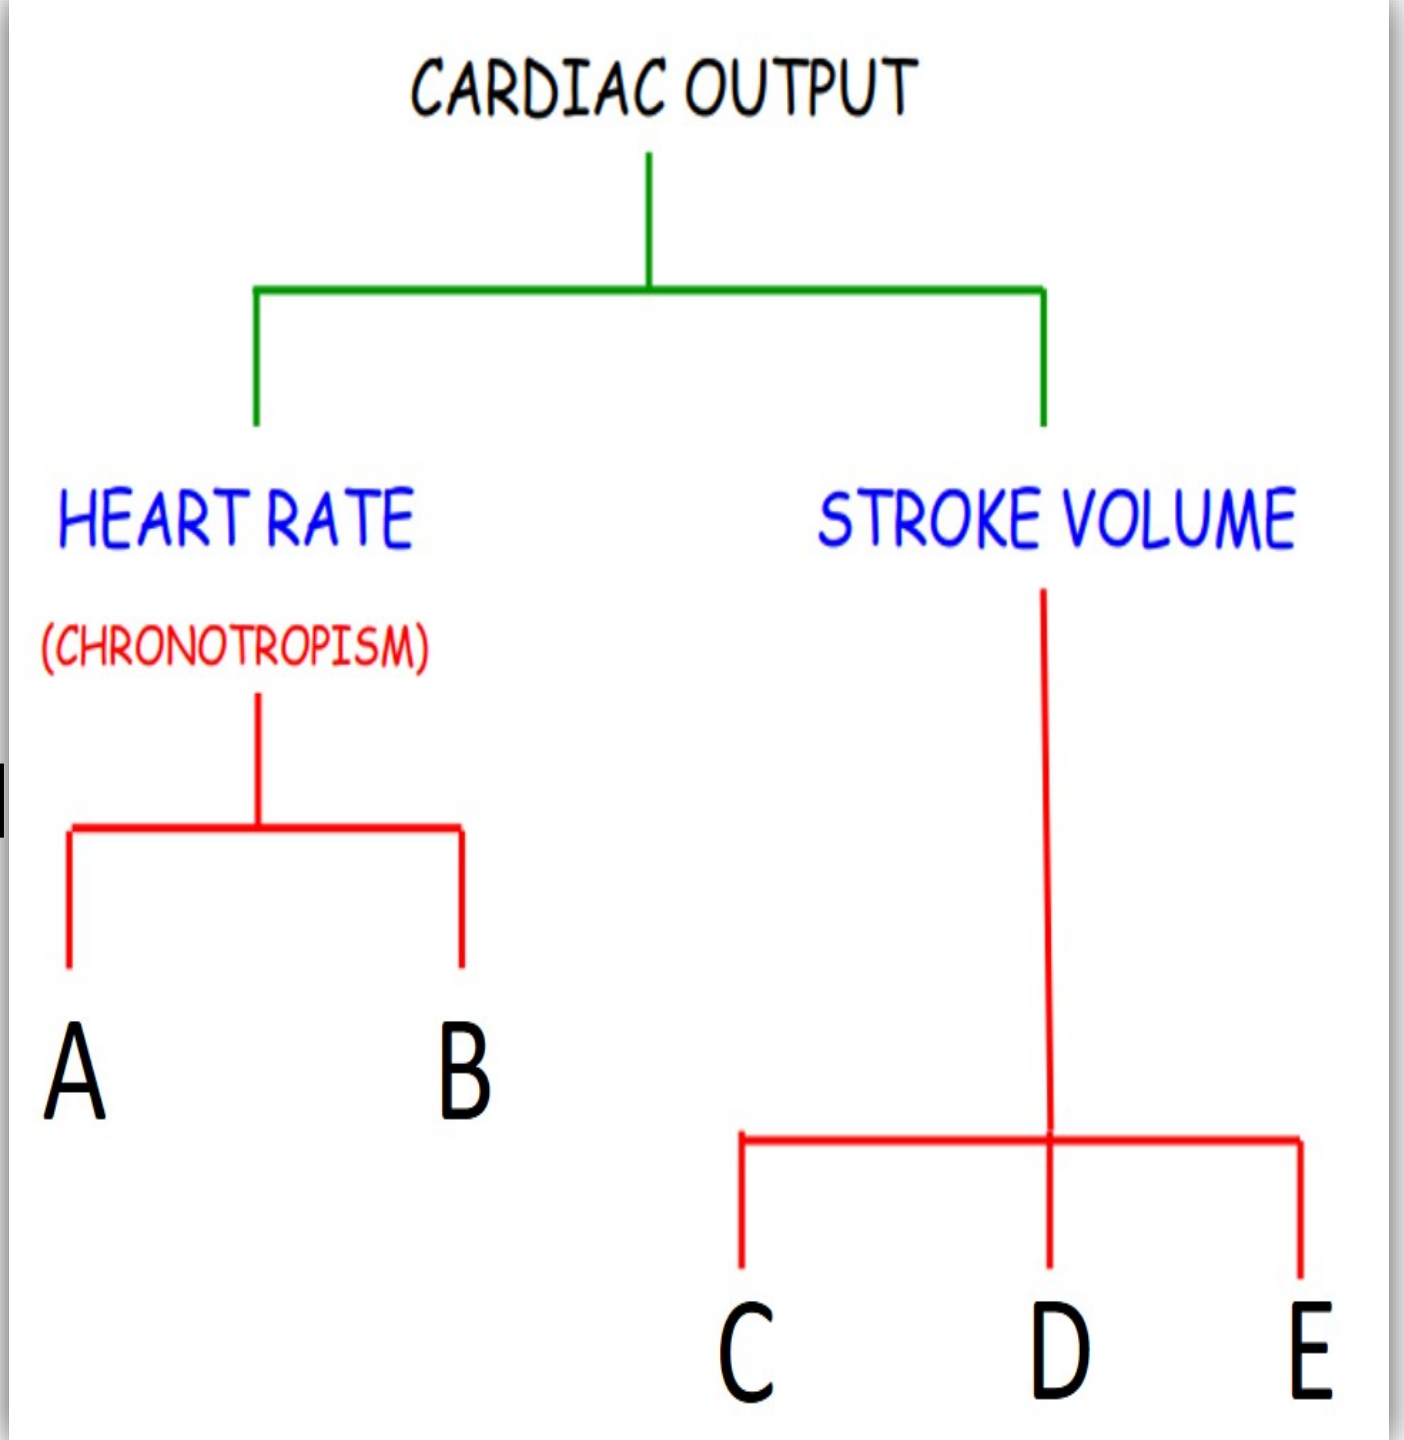

SPOT NO.3

1. Identify the action potential
2. What are its phases?
3. What happens in each phase?

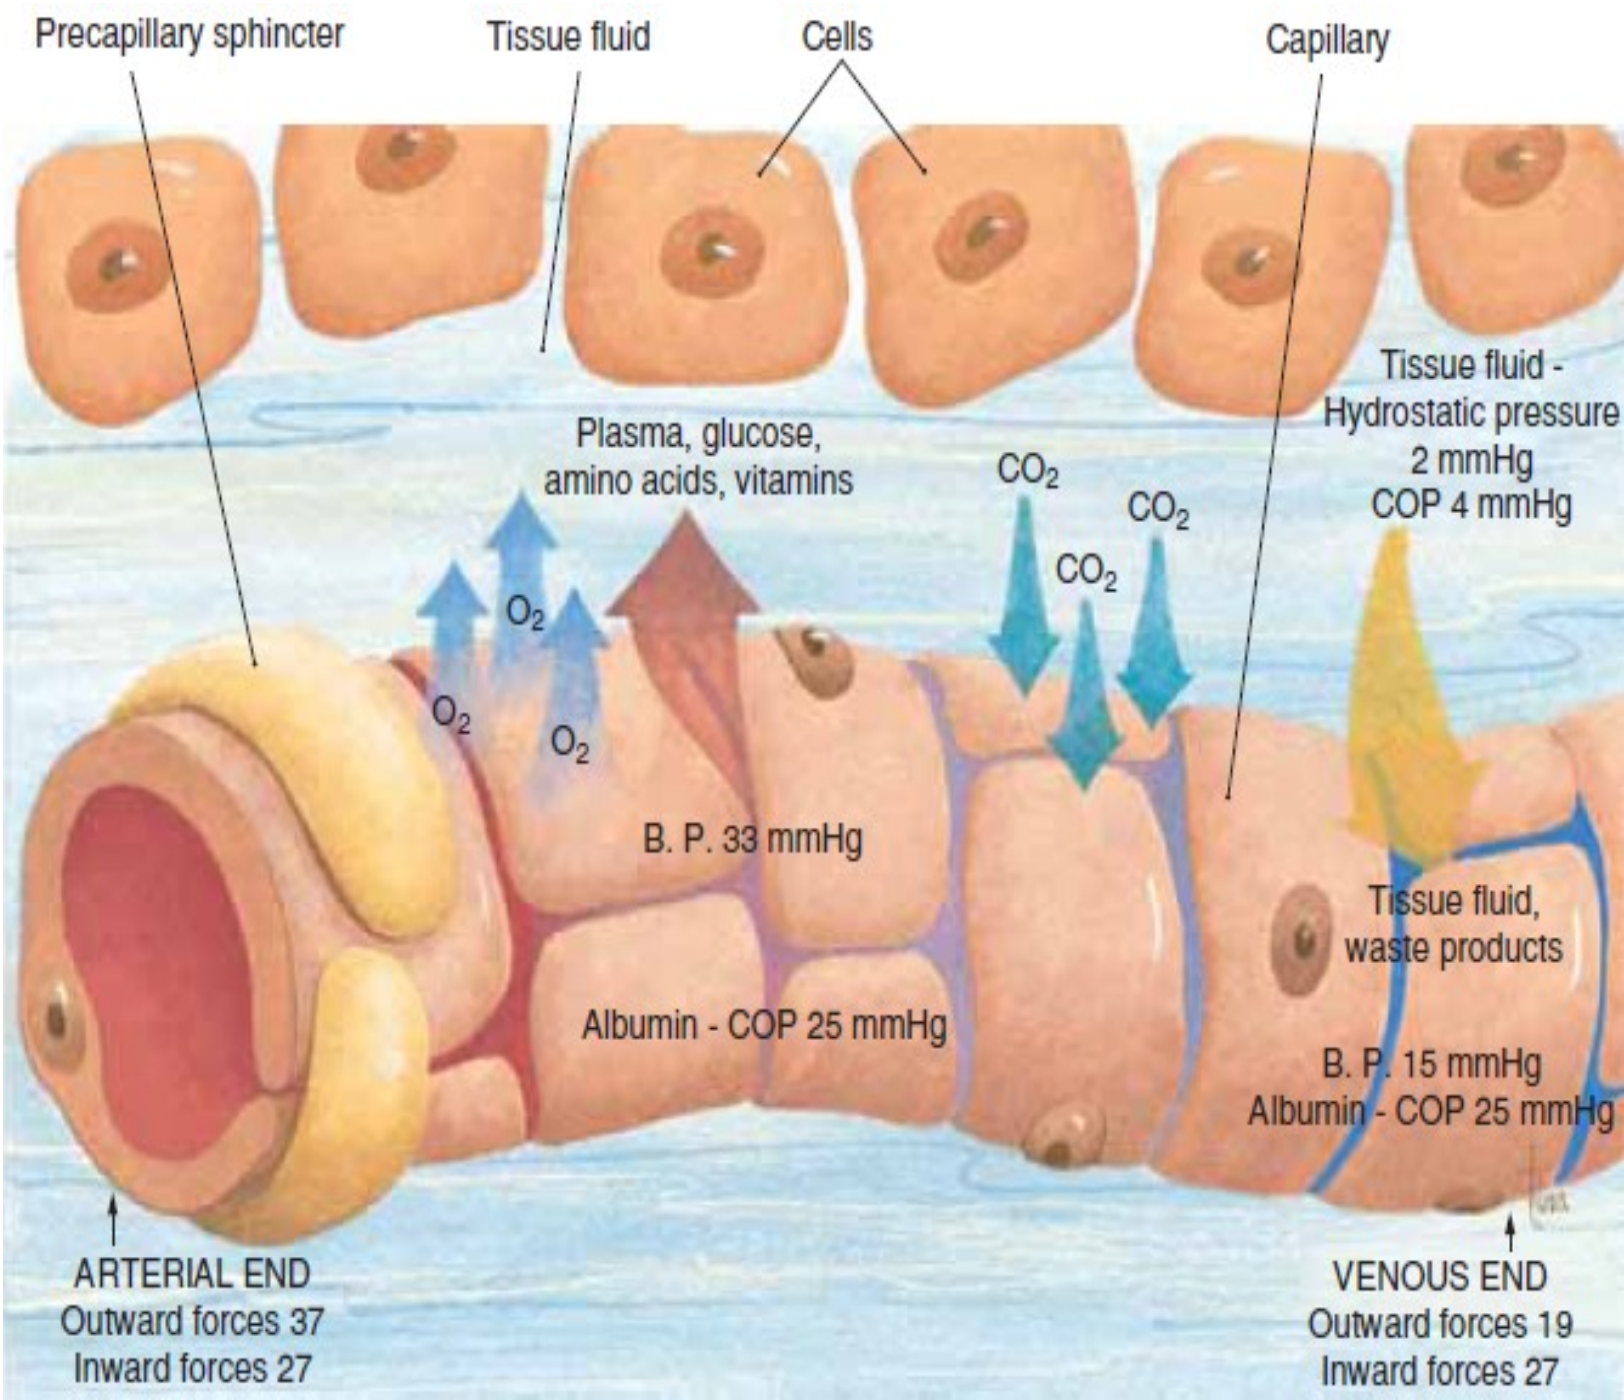

SPOT NO.4

1. Identify A, B, C, D & E
2. Name the Positive Inotropic factors.
3. How HR is decreased by parasympathetic stimulation

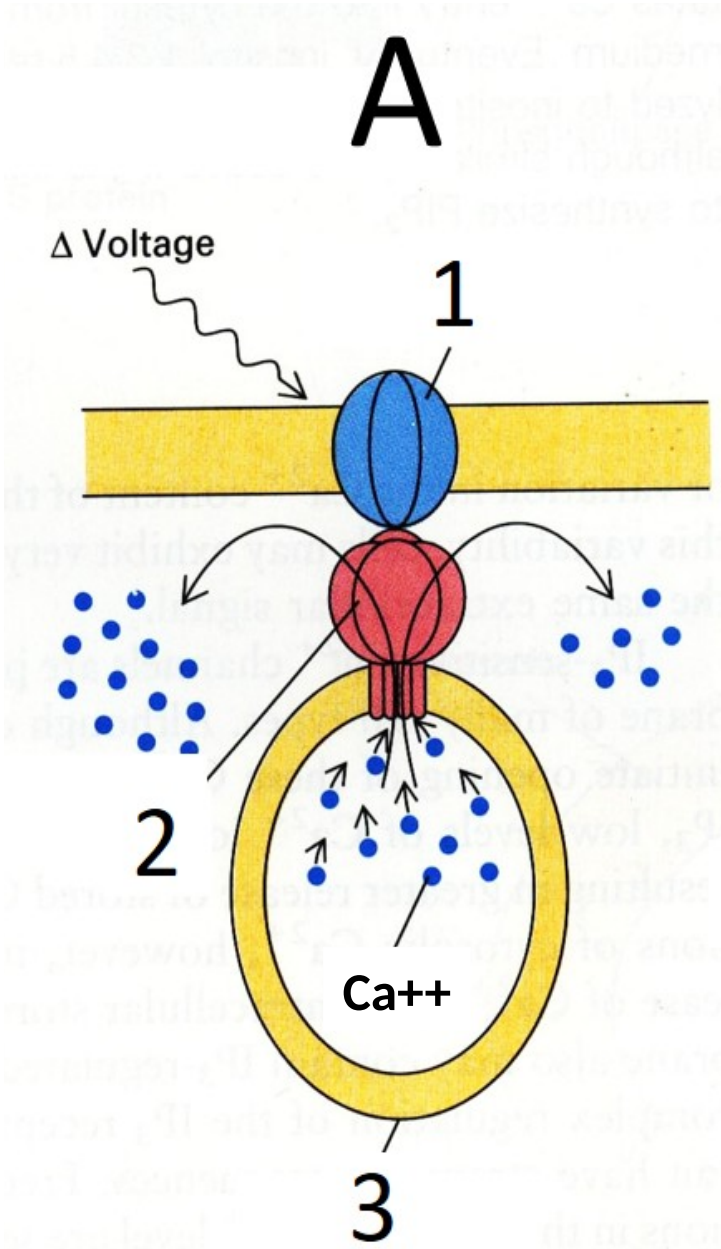

SPOT NO.5

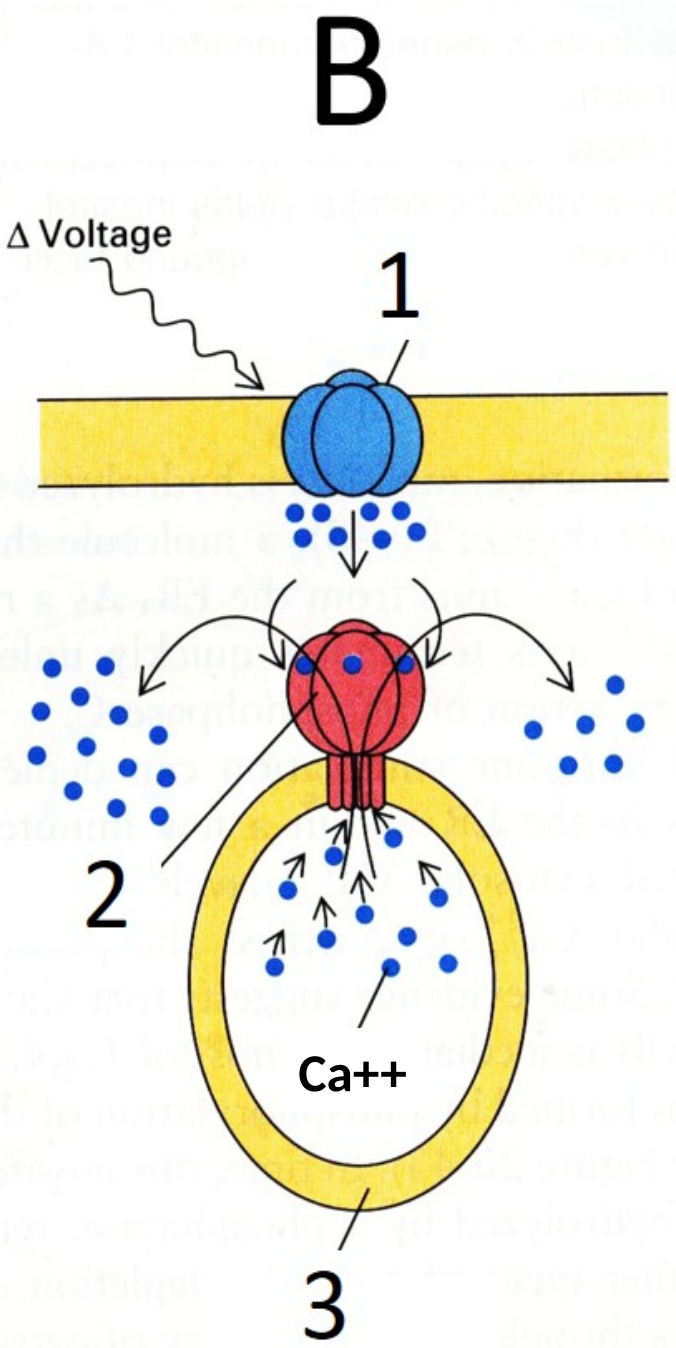

1. Name the Starling's forces
2. Which forces cause filtration and which cause reabsorption in the capillaries
3. What is Frank-Starling's Law of the Heart

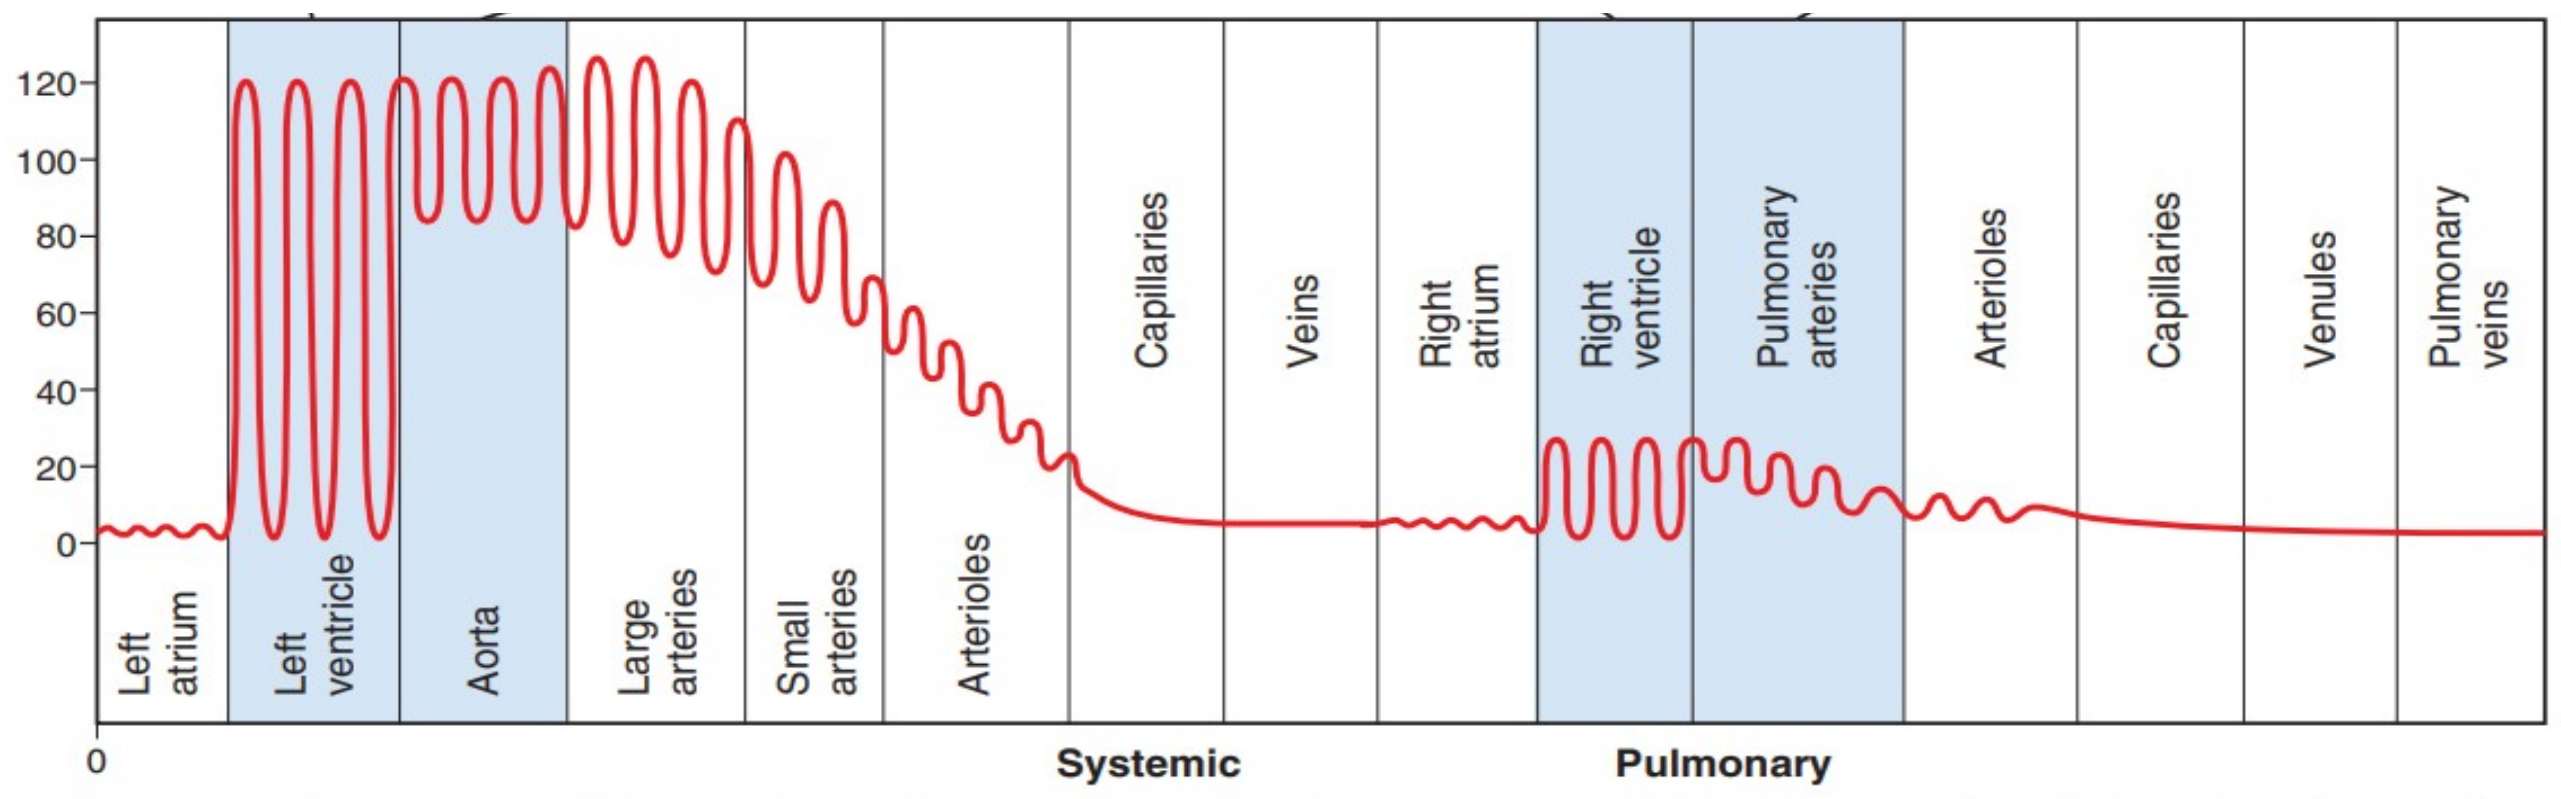

SPOT NO. 6

1. Identify the excitable muscle A & B
2. What is the difference in stimulation between the two
3. Identify 1, 2, & 3

SPOT NO. 7

1. Write down the systolic & diastolic pressures in Rt. and Lt. ventricles.
2. Write down the formula for mean arterial pressure.
3. List the short-term mechanisms for the control of blood pressure
