DIGESTIVE SYSTEM
OSPE

DAY 1

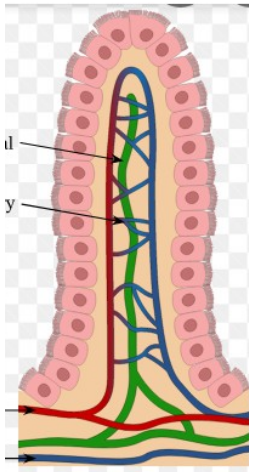

SPOT NO.1

1. Identify A, B, & C?
2. How much do each increase the surface area of intestine?
3. Secretions poured by small intestine contain which type of enzymes?

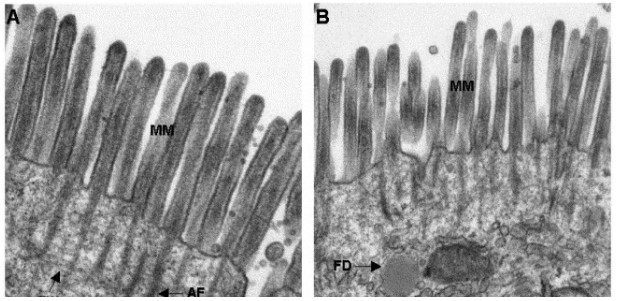

A

B

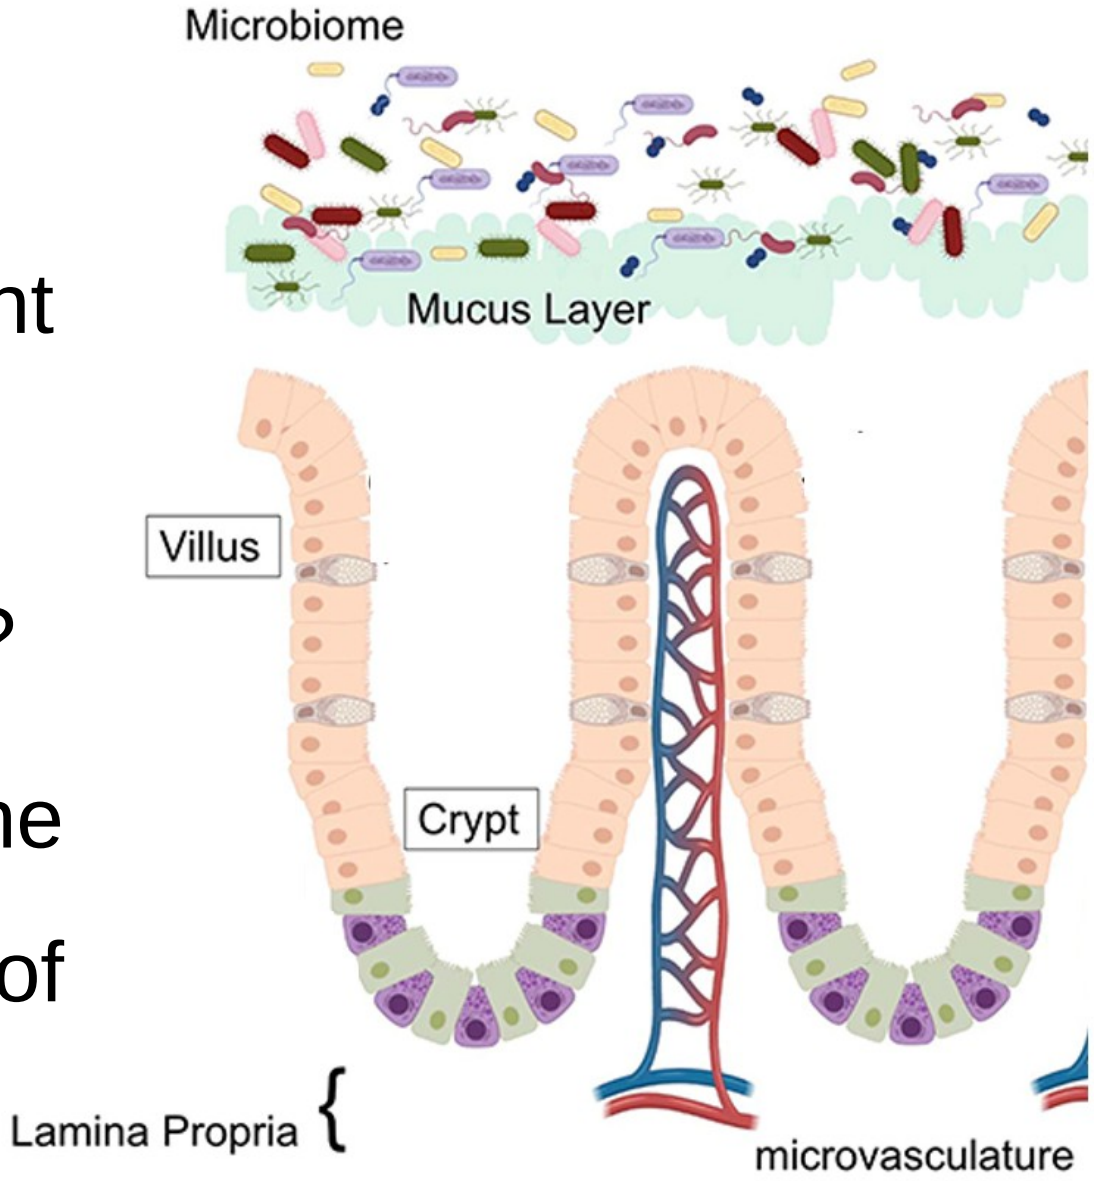

C

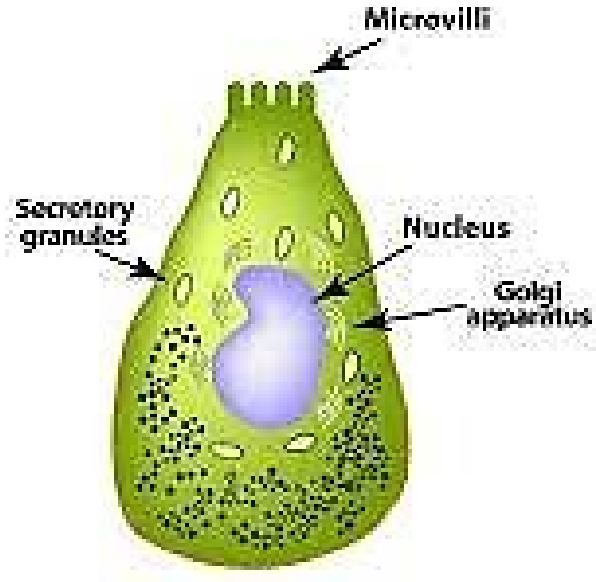

SPOT NO.2

1. How many types of cells are present in the small intestinal mucosa?
2. What is the function of Paneth cell?
3. How much fluid is absorbed from the small intestine during the passage of chyme?

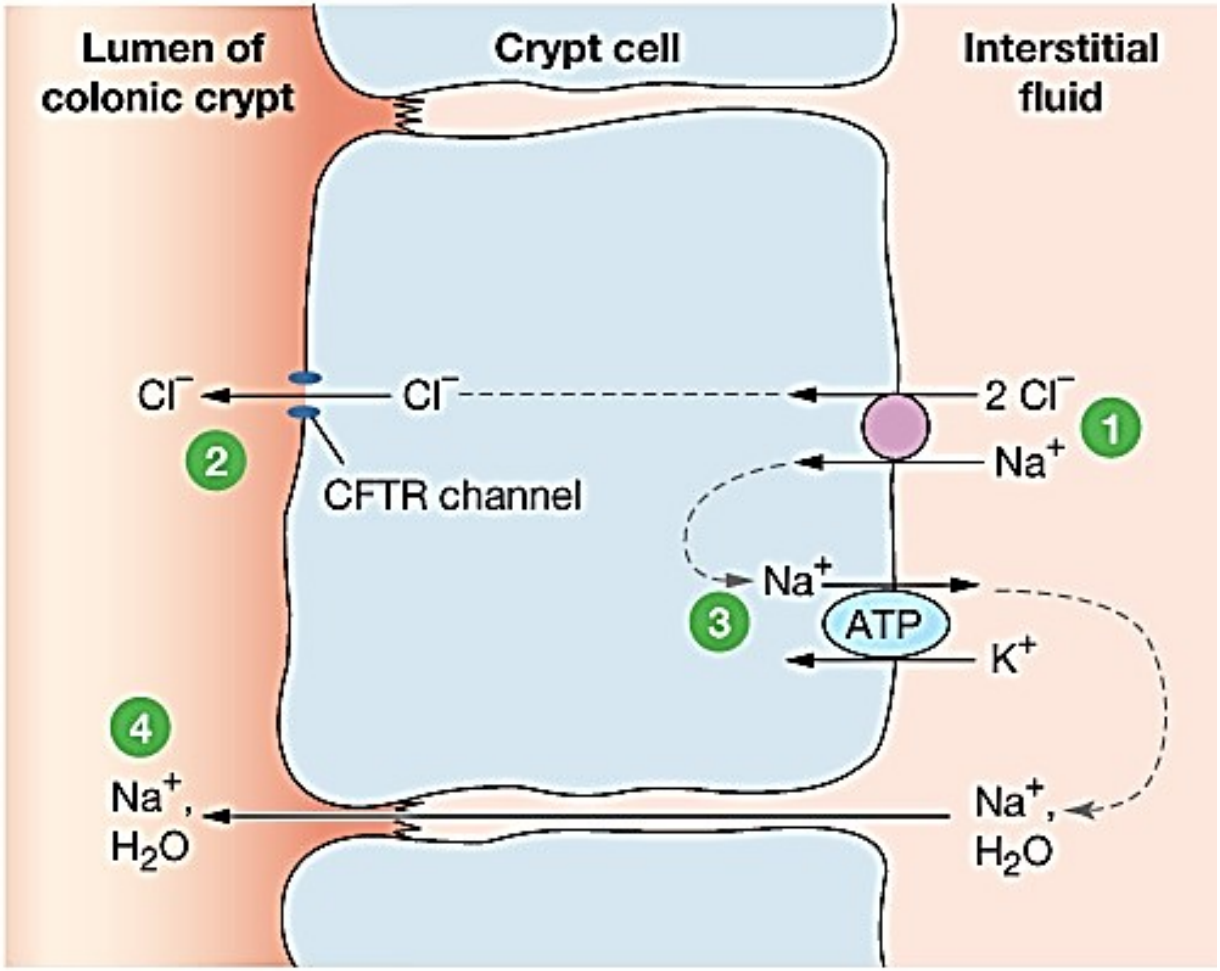

SPOT NO.3

1. Write down the names of hormone secreted by each cell: I cells, K cells, L cells, and N cells
2. What are the functions of hormone secreted by Mo cells?
3. What are the functions of hormone secreted by I cells?

SPOT NO.4

1. What is the importance of CFTR channel protein?
2. Name a condition where CFTR protein is not working properly, trapping Cl- inside the cell.
3. Which toxin stimulates this protein causing secretory diarrhea

SPOT NO.5

1. Which two types of movements occur in the small intestine?
2. Which two types of movements occur in the large intestine?
3. What is gastrocolic reflex?
