DIGESTIVE SYSTEM
OSPE

DAY 3

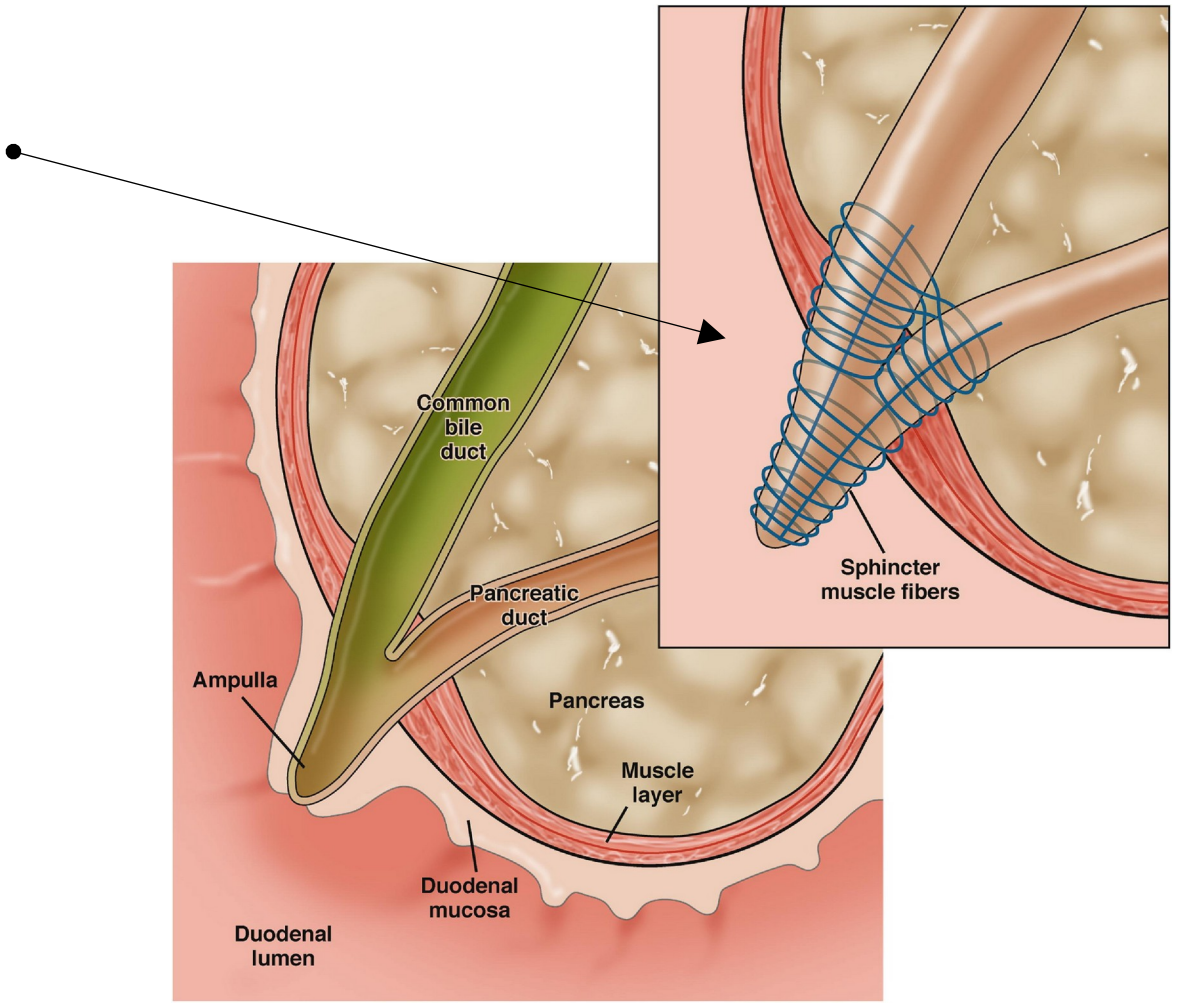

SPOT NO.1

1. Write the full names of transporters A, B and C.
2. Where else is transporter C found in the body?
3. By which type of transport is glucose absorbed from intestinal lumen?

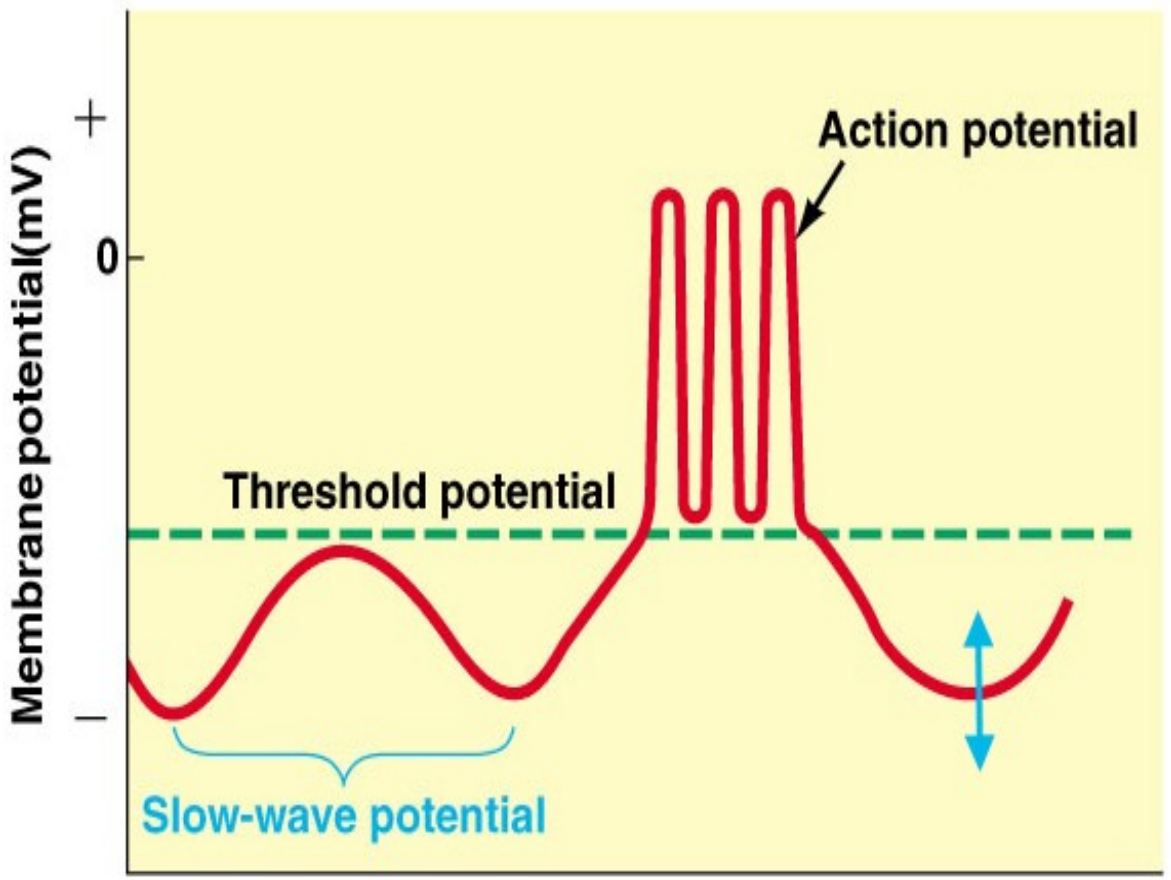

SPOT NO.2

1. Name the sphincter shown.
2. What is the effect of the hormone CCK upon it?
3. Write down the rest of the effects of CCK on GI tract.

SPOT NO.3

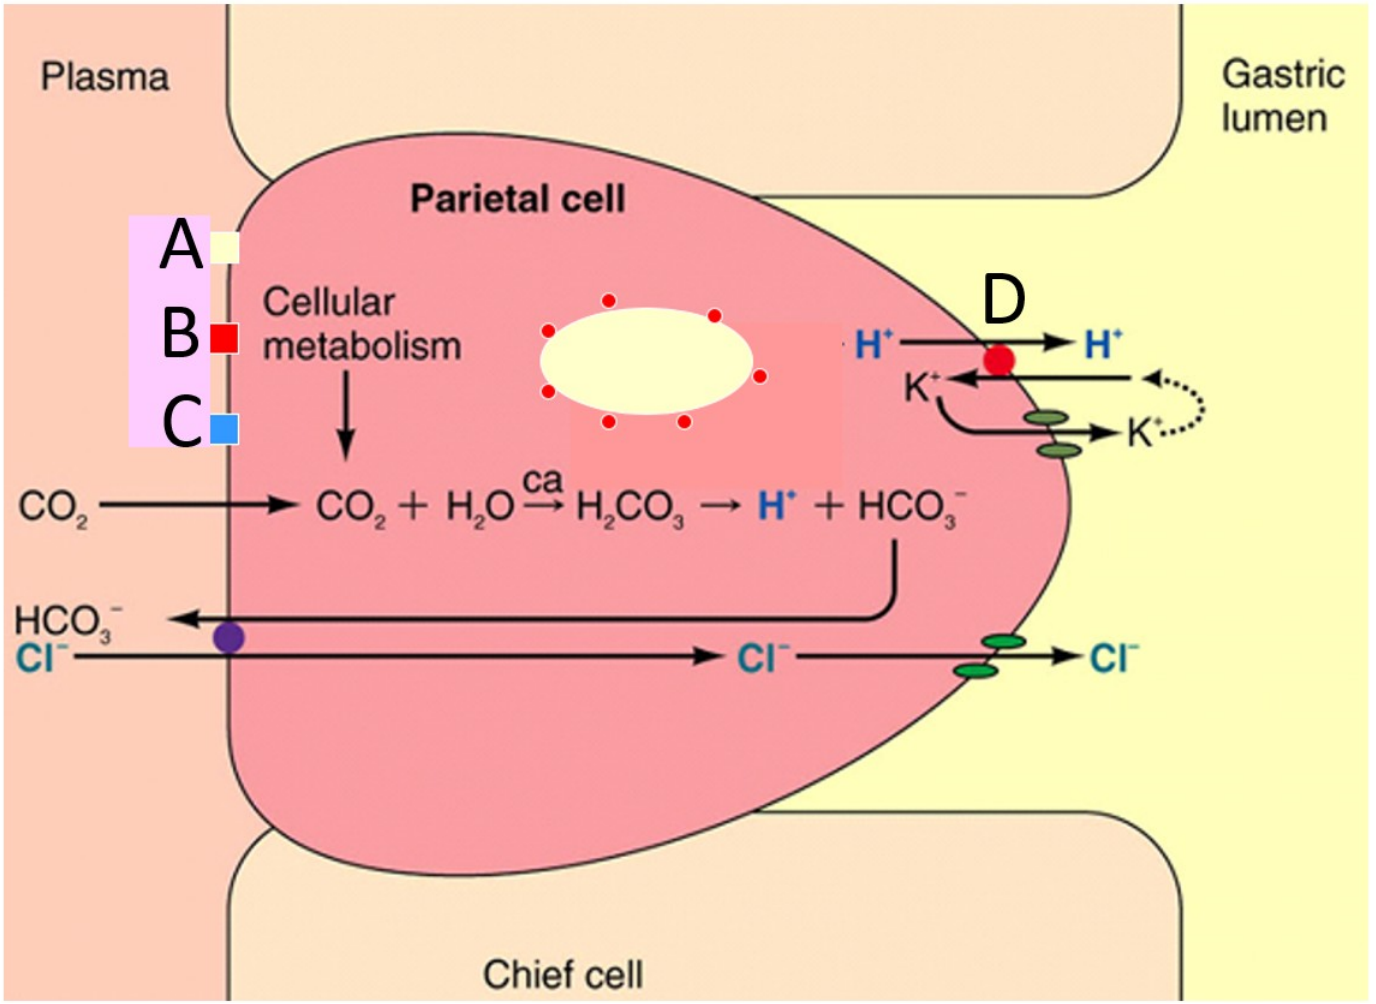

1. Write down the voltage b/w which slow wave potential fluctuates.
2. Depolarization phase of action potential is due to which ion?
3. Repolarization phase of action potential is due to which ion?

Sherwood Figure 8-31b

SPOT NO.4

1. Name any 3 hormones / neurotransmitters (A, B, C) that stimulate HCl secretion.
2. What is protein D called?
3. Write down the name of a common drug used against the protein D.

SPOT NO.5

1. Name the type of movement seen in the large intestine.
2. How many times / day these movements occur?
3. What is the name of the reflex that initiate this movement?
